

21.10.21

Dear Parents/carers,

We will be celebrating STEM fortnight from week commencing 15th November 2021. As a whole school homework, we are asking the children to produce something to do with '**Innovating for the future**'.

It could be:

- a poem
- an investigation
- a model

The choice is yours as long as it has a link with science, technology, engineering and/or maths (STEM). We are not yet able to hold an exhibition as we have done in the past but we will share the work on the school website. Please email your child's work to: science@oxtontsaviours.wirral.sch.uk by Friday 3rd December 2021. This has been such a popular event in the past and the work produced, a great celebration of the children's interests and learning in STEM subjects.

We will also be celebrating during STEM fortnight with a **raffle** for amazing STEM prizes. You can purchase tickets (£1 for a strip of 5 tickets) on the school yard each morning 8.30–8.45am and each afternoon 3.30–3.45pm. The draw will take place on Monday 29th November and winners announced in the November newsletter.

Prizes include....

PLUS MORE!

Many thanks,

The STEM team: Mrs Stewart, Miss Milburn and Mr Purslow.
